

CANAGRID™ Coffered Specialty Ceilings are constructed from a glass fiber, reinforced gypsum lightweight material. The system offers a simple way to create a coffered ceiling using a standard 2' x 2' t-bar ceiling grid. These panels are designed for new and existing ceiling tile grid systems. These panels are extremely lightweight at approximately 8 lbs per 4 sq. ft. This feature is due to our revolutionary plaster fiber emulsion and state of the art manufacturing processes. These panels are primed and ready to apply your choice of finish.

Product Information

Materials: Lightweight gypsum with a plaster fiber emulsion.

Finish: Standard latex primer.

Size: 23' 3/4" x 23' 3/4"

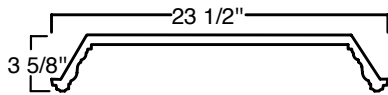

Surface: Smooth

Colour: White

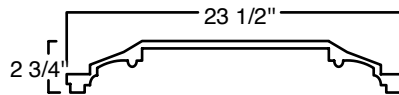

Available in different designs.

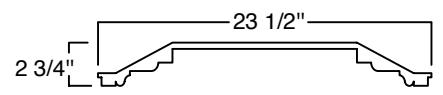

PLA-GRD-T001

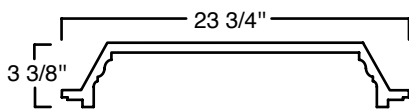

PLA-GRD-T002

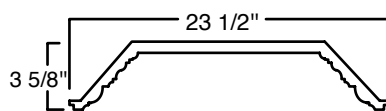

PLA-GRD-T003

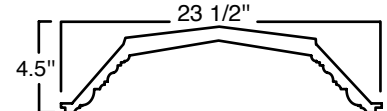

PLA-GRD-B001

PLA-GRD-D001

PLA-GRD-D002

Easy installation.
